

Cardiovascular Medical Group of Southern California

Healthcare / Health Services
Beverly , US

Description

The Cardiovascular Medical Group of Southern California is seeking a board-certified or board-eligible Cardiologist to join our team in the “Golden Triangle” of Beverly Hills, California, located between Cedars Sinai Medical Center and UCLA. We provide state-of-the-art care in an academic medical environment. Our cardiologists, who maintain academic appointments, are alumni of institutions such as MIT, Harvard, Stanford, Mayo Clinic, UCLA, Emory, Cedars-Sinai Medical Center, and UCSF.

Our team includes nurse healthcare extenders, contributing to our comprehensive and collaborative approach to patient care. We are committed to providing immediate and thorough care, ensuring a seamless experience for our patients through coordination of care with sub-specialty consultants and our affiliated University Hospitals.

Our office campus offers hospital-level diagnostic technology and treatments. For example, we provide a full spectrum of services, such as PET stress tests, SPECT stress tests, pyrophosphate scans, MUGA tests, and a world-class demonstration CT center of excellence. Opportunities to participate in our exclusive concierge medicine services further enhance the physician’s experience and amplify our comprehensive care. As a member of our team, you will have the ability to practice all aspects of Cardiology and affiliate with Cedars Sinai Medical Center and the Cedars Sinai Smidt Heart Institute. Research opportunities and advanced diagnostics and therapies are available through our non-profit research foundation as well.

Responsibilities:

Provide medical services in cardiology, internal medicine, and concierge medicine in office and hospital environments.

Engage in women's health services is desirable, but not a requirement.

Interpret a variety of cardiac imaging studies including working with cutting-edge AI technologies.

Participate in our concierge medicine program with the opportunity to develop an exclusive practice.

Supervise and collaborate with Nurse Practitioners and Physician Assistants.

Provide hospital and office consultation; continued care; and coordination of care.

In addition to clinical responsibilities, there are unique opportunities to engage in groundbreaking research through our Cardiovascular Research Foundation of Southern California. As the non-profit research arm of our group, the foundation is dedicated to conducting innovative research and education to advance the diagnosis and treatment of cardiovascular diseases. Our research foundation has ongoing studies in various areas of cardiology, providing an exceptional environment for physicians interested in contributing to the advancement of cardiac care and treatment.

Qualifications:

Board-eligible and board-certified in Internal Medicine and Cardiology.

Medical license to practice in California.

Interest in internal medicine, preventive cardiology, and concierge medicine services.

Board Certification in imaging modalities if there is a desire to participate in our interpretation panels.

Strong commitment to patient care and excellence in the field.

Must be eligible and obtain admitting privileges at Cedars Sinai Medical Center.

Compensation and Benefits:

Competitive salary.

Comprehensive health insurance.

Opportunities for continuous medical education.

This is a partnership track career opportunity.

Work Culture and Environment:

Our group, located in the vibrant Beverly Hills area, prides itself on offering an upscale, dynamic, and innovative work environment. We are committed to providing the highest level of care with state-of-the-art equipment and facilities. Our team is dedicated to fostering respect, integrity, and professionalism.

How to Apply:

Interested candidates are invited to submit their CVs to Susan Essenfeld, CEO, at Patientrelations@cvmg.com. For more information, please contact us at 310-278-3400. <http://www.cvmg.com> <http://www.cvrf.net>

Cardiovascular Medical Group of Southern California

Company Overview

The Cardiovascular Medical Group of Southern California (CVMG) in Beverly Hills is recognized for providing cutting-edge treatment and care in cardiology. This esteemed center offers a comprehensive range of cardiology subspecialties, ensuring that patients have access to specialized care tailored to their specific cardiac conditions.

CVMG's array of services includes advanced diagnostic and therapeutic procedures. With a team of board-certified cardiologists and internal medicine specialists, they provide a full spectrum of general and specialized cardiovascular services. These services cover areas such as cardiovascular risk screening, disease management, internal medicine, echocardiography, CT coronary angiography, carotid ultrasound, nuclear stress tests, treadmill stress tests, and state-of-the-art CT imaging for non-invasive diagnostic studies.

The Cardiovascular Research Foundation of Southern California, affiliated with CVMG, further contributes to the cutting-edge care by conducting innovative research in various aspects of cardiology. The foundation has been involved in over 30 separate research studies, focusing on medication, intervention, and innovation in cardiovascular treatment. Their research has led to significant advancements in the field, including the introduction of new medications for coronary artery treatment and prevention, personal EKG devices for arrhythmia detection, and non-invasive approaches for coronary intervention.

CVMG and the Cardiovascular Research Foundation of Southern California stand out as

premier institutions in cardiology, offering comprehensive and advanced care to patients and leading significant developments in cardiovascular research and treatment.

Company History

The history of the Cardiovascular Medical Group of Southern California (CVMG) and the Cardiovascular Research Foundation of Southern California is deeply intertwined with the evolution of cardiology in the region, particularly their connection with the development of prestigious institutions like Cedars-Sinai Medical Center.

CVMG played a pivotal role in helping to establish Cedars-Sinai Cardiology decades ago. This contribution underscores its foundational impact in shaping cardiology services and training in the Los Angeles area. Additionally, faculty members from CVMG have a history of being in leadership positions at surrounding hospitals. Notable individuals like Dr. Jemy Swan, Dr Timothy Henry previous Chiefs of Cardiology at Cedars chose to join the organization after their tenure further emphasizing its significance in the medical community.

The current directors of divisions at CVMG continue this tradition of leadership and innovation in cardiology with a substantial engagement with organization. Both CVMG and the Cardiovascular Research Foundation have been instrumental in introducing new treatments, devices, and approaches in cardiac care. The Cardiovascular Research Foundations training program continues to train the Cardiac fellows at Cedars-Sinai, UCLA, nationally and internationally. The contributions extend to the advancement of medical knowledge, with the facility producing thousands of peer-reviewed papers and presentations. This scholarly work has significantly contributed to the field of cardiology, shaping clinical practice and guiding future research.

Members of these organizations have also played influential roles in major professional cardiac societies such as the American College of Cardiology (ACC), the American Heart Association (AHA), the Society of Cardiovascular Computed Tomography (SCCT), and the Heart Rhythm Society. Their involvement in these societies, including positions on editorial boards and leadership roles, highlights their commitment to advancing cardiology both clinically and academically.

The influence of CVMG and the Cardiovascular Research Foundation in the realm of cardiology is thus multifaceted, encompassing clinical innovation, academic contribution, and leadership within the broader medical community.
